

WAREHOUSING

SabeRex[®]

A TyRex Technology Family Company

Warehousing

At SabeRex, our team is good at solving client problems, including those that include extensive warehousing and logistics capabilities.

Our company has provided comprehensive technology solutions for over two decades and our management team boasts a diversified portfolio of experience in the technology industry. And, when it comes to warehousing and logistics, SabeRex has an accuracy of greater than 99.99% measured in terms of on-time, damage and accuracy.

SabeRex services customers world-wide and has expertise in shipping both domestically and internationally with quality service partners that ensure products are delivered at the time and place they are needed. SabeRex also uses robust warehouse management systems that allow us to seamlessly integrate with our customer's sales order systems through a data dictionary that ensures full system integration. In fact, our systems provide advanced reporting capabilities and real-time inventory and order status transparency down to the product ID and serial number levels.

**Bottom line ... if you have a warehousing and logistics problem, SabeRex can solve it.
One Call ... Problem Solved!**

SabeRex: What We Do ...

Providing simple to complex solutions throughout the entire product life cycle, SabeRex can take your product from beginning to end and everywhere in between. To that end, we offer our clients best-in-class, custom service offerings through our **Core Competencies**:

Additive Manufacturing

Integrated Logistics

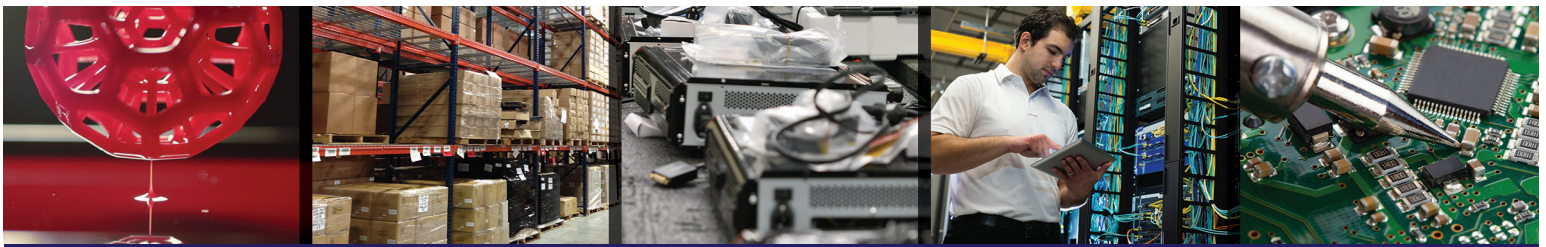

Value-Add Configuration

High-Value Electronics Repair

Complex Contract Manufacturing

Technical Field Services

See reverse side for more information and log on to saberex.com for full details.

Your Technology Solutions Partner **SabeRex**[®]

Core Competencies

Additive Manufacturing

By utilizing Carbon's M2 printer and leveraging its DLS technology, SabeRex can customize and manufacture 3D printed parts based on key factors such as density, tension and heat capacity while maximizing efficiency and cost-savings.

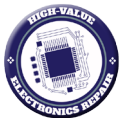

Integrated Logistics

Take advantage of our secure, climate-controlled warehousing for your existing inventory, or add even more value by leveraging the power of SabeRex to manage your entire logistics process.

Value-Add Configuration

We pride ourselves on the ability to provide any customized configuration your existing products may need, along with the supply chain and product life cycle expertise to support your product's evolution beyond its original design.

High-Value Electronics Repair

With a focus on complex circuit boards designed for every application, our expert staff provides turn-key repair services that deliver cost-effective board replacement as well as enhancement at the highest quality to a number of industries.

Complex Contract Manufacturing

Whether your team is developing a single prototype or rapidly expanding to large-scale production, our staff provides customized manufacturing solutions that balance cost-effectiveness with rapid turnaround time.

Technical Field Services

Whether off-site, at your facility or at our own, our field technicians provide every service necessary to manage your product throughout its life cycle by implementing a custom end-to-end program.

Technology Partnership

By integrating all of our services with those provided by the other companies of the TyRex Technology Family, SabeRex can become your complete product partner. **See how by logging on to tyrexmfg.com.**
